INTERFERENCE SEARCHED			
Class	Sub.	Date	Exmr.

Figure 1 consists of four panels, (a) through (d), each showing a plot of the probability distribution $P(x)$ versus x . The x-axis for all panels ranges from 0 to 100, and the y-axis ranges from 0 to 0.001. Panel (a) is for $\alpha = 0.05$, showing a relatively smooth, bell-shaped distribution centered around $x = 50$. Panel (b) is for $\alpha = 0.1$, showing a slightly broader and more irregular distribution. Panel (c) is for $\alpha = 0.2$, showing a distribution with more pronounced fluctuations and a slightly wider spread. Panel (d) is for $\alpha = 0.3$, showing the broadest and most irregular distribution, with significant fluctuations and a wider spread of values.
